

## M3 MOBILE MAP MANAGER

Maser Consulting makes it easier than ever before to use Geographic Information Systems (GIS) to conduct your field operations and manage your projects with real-time updates from the field. Implementing our **M3 Mobile Map Manager**, provides your organization with a powerful suite of tools to manage your assets and related information including geographic location, inspection, assessment, condition monitoring and asset history. You can even launch work orders from the convenience of your mobile device.

### HOW IT WORKS

**M3 Mobile Map Manager** acts as a project-based geospatial repository, providing a digital workflow that is accessible to field and office staff in real-time. Reduce your paper trail by eliminating hand-written project forms such as; reports, violations, inspections, asset mapping and assessment. The **M3 service** streamlines your business processes by incorporating smart, digital workflows and improving access to important project information and data from anywhere at any time.

This turnkey GIS mobile solution improves the efficiency of your existing workflow while providing a centralized location to store data with a common dashboard environment improving accuracy, efficiency and operations analysis.

### KEY BENEFITS

- Digital Workflow from Field-to-Office
- Integrate & Access Field Data Status in Real-Time
- Enhances the Decision-Making Process
- Affordable Deployment, Maintenance & Support
- Configurable & Scalable as Needed
- Configurable Role-Based Security
- Accessible Over the Internet & Leading Mobile Device Products

### MOBILE INFRASTRUCTURE MANAGEMENT TOOLS

As an Esri Silver Partner, Maser Consulting has been helping clients effectively manage their operations through intuitive, web-based GIS since 2001. Whether our **M3 Mobile Map Manager** is deployed for project management through real-time field communication and information sharing, or system-based asset management, our team provides deployment, maintenance, training and support for your program, giving you the confidence to make informative business decisions on-the-spot.

## PROGRAM FEATURES

- Real-Time Asset Tracking
- Real-Time Status Dashboard
- Location-based Asset Inventory
- Bar & QR Code Processing
- Mobile Project Forms
- Link Documents & Multimedia Files
- Historic Record Access
